Acme Technologies Inc. — Annual Report 2024

Management Discussion and Financial Review

Acme Technologies Inc. reported consolidated results for fiscal year ended December 31, 2024. During fiscal year 2024, Acme achieved record total net sales of $150,000 million, representing a 12% increase year-over-year. Gross profit expanded to $65,000 million, while operating income reached $40,000 million.

Operating activities provided positive net cash of $48,000 million. Diluted earnings per share (EPS) was $4.50 compared to $3.90 in fiscal 2023.

Consolidated Statements of Operations & Balance Sheet

For fiscal 2024, net income was $30,000 million compared with $26,000 million in fiscal 2023. As of December 31, 2024, Acme held total assets of $200,000 million, including cash and cash equivalents of $25,000 million.

Total liabilities stood at $120,000 million, including total debt of $45,000 million comprised of term debt and commercial paper notes. Total shareholders' equity was $80,000 million.

Item 1A. Risk Factors & Contingencies

The company operates in highly competitive global markets. Elevated interest rates on floating rate commercial paper represent liquidity and credit risk. Management identified supply chain disruption risks that could lead to decreasing profit margins in subsequent quarters.

The independent auditor issued an unqualified opinion on the consolidated financial statements with no going concern doubts.
